Version 3.6 mobile apps release

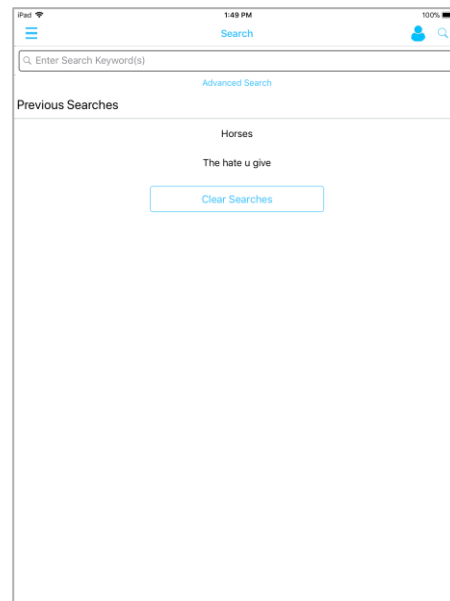

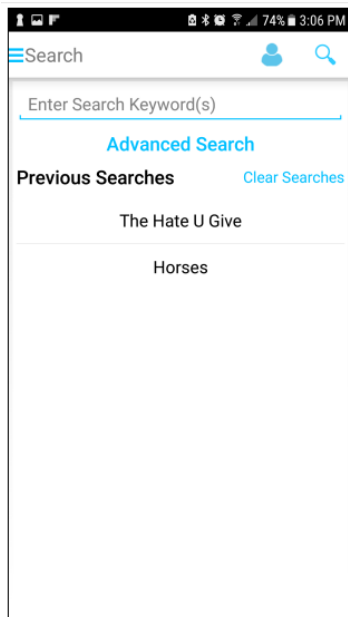

Android/iOS 3.6: Release Notes

Enhanced Features

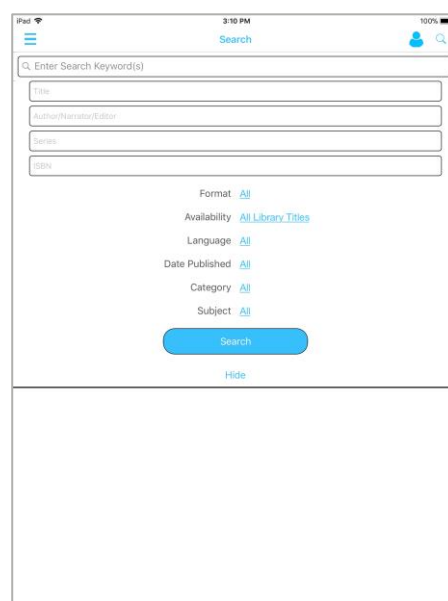

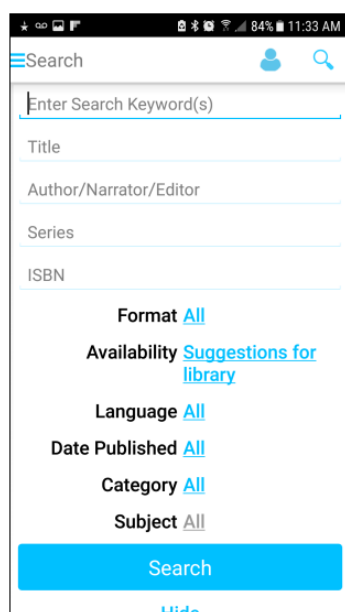

Advanced Search

- We are thrilled to announce that Android and iOS version 3.6 now offers advanced search capabilities.

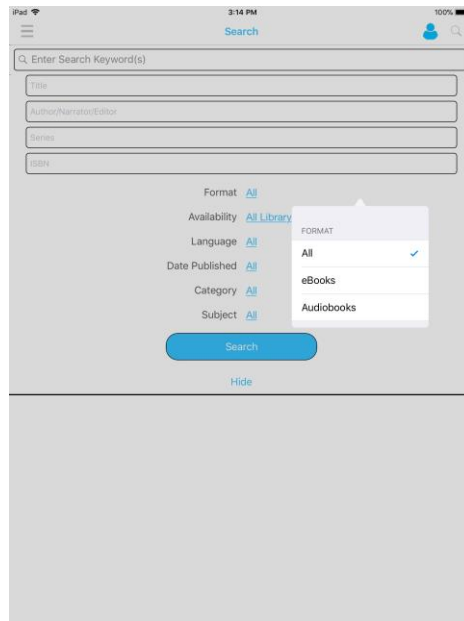

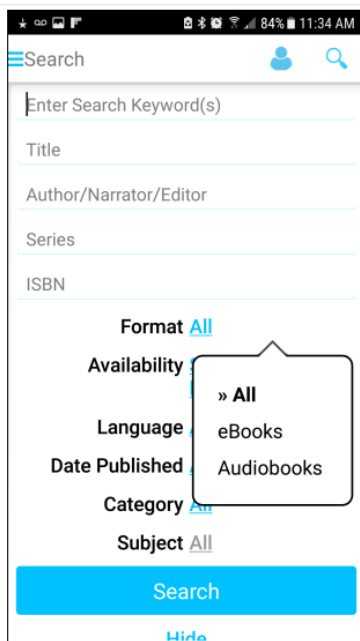

Tap on the magnify glass to search by keyword and easily see previous searches

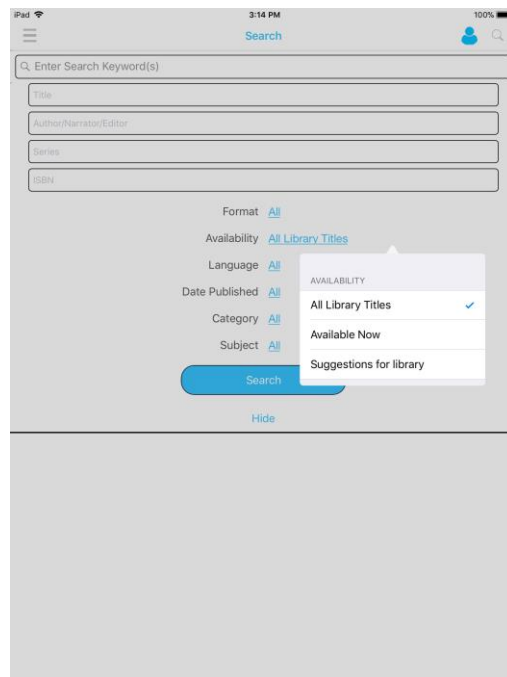

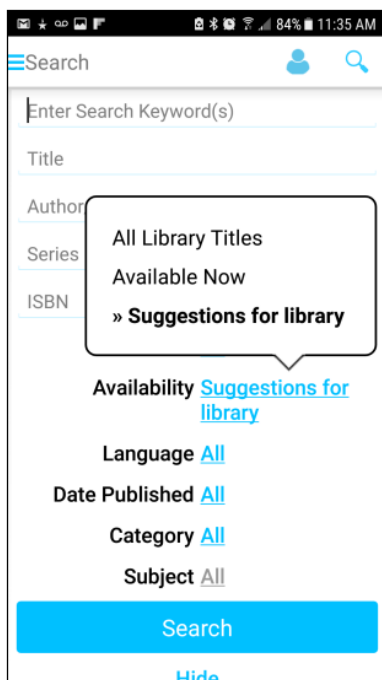

- Tap **advanced search** to search by title, author, series or ISBN

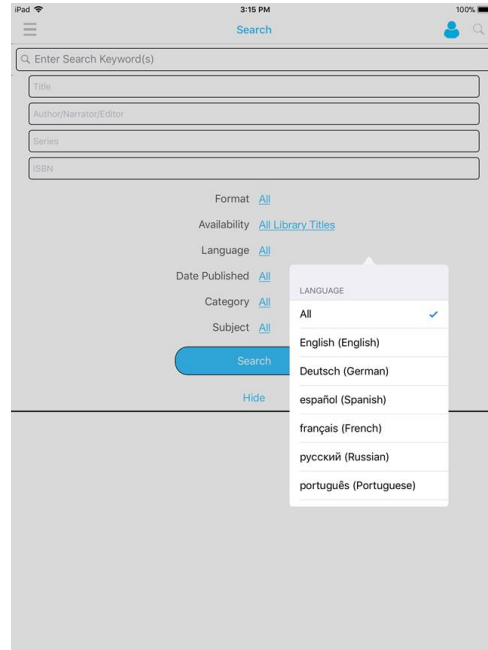

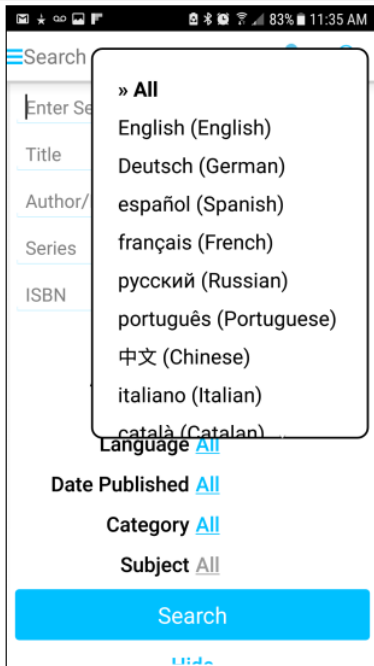

Filter results by **Format**:

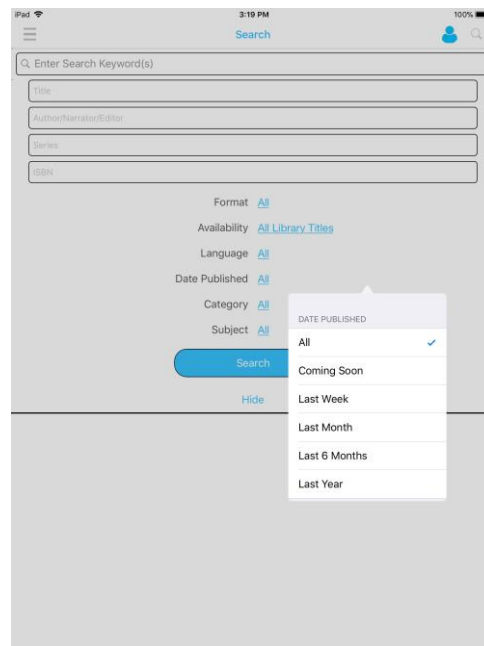

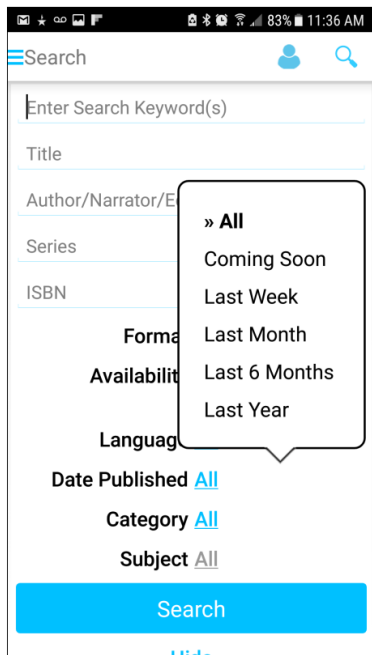

Availability:

Subject:

*** If your library patrons don't see the advanced search option yet in the apps, that means we're still working on rolling this feature out to you. We suspect to have this completed very soon.

Below is a screen shot of our new search screen without advanced search:

Additional Features/Fixes

- | Updated audiobook player
- | Hold button will be suppressed for expressCollection libraries
- | Added Welsh language option
- | Dutch language translation improvements
- | iOS added in-app swipe down action in My Books to refresh account information.
- | Various bug fixes
